

Zendor the Barbarian - An Adoptees Quest for Identity Part Deux

Do you believe in extraterrestrials? Do you believe they could be living here on Earth now? What if you were one and didn't know it? What if the more you learned about yourself, the more your life became a complete mystery? What if you had an insatiable curiosity about extraterrestrials, only to find out you are a human hybrid or an extraterrestrial yourself? What would you do? In whom would you confide? How would you resolve the challenges in belief systems that were threatened by your mere existence? Would you remain sane? Zendor the Barbarian - Part Deux is the continuation of a new millennial myth wrapped in a true story about an orphan's discovery of his extraterrestrial origins and the trials and tribulations of garnering wisdom in a world that seems so foreign. His life unfolds as his curiosity builds, with things adding up to more than he ever expected along the way, including interactions with beings many have encountered to date. Zendor the Barbarian wields a sharp intellect and insatiable quest for understanding the weird stuff that happens to him as he questions the nature of reality and his place in it. In this volume he is confronted with several moments of what can only be called quantum entanglement as he journeys down the rabbit hole. He takes the reader on timely explorations of possibility and offers poignant considerations that could affect your life dramatically. Knowing his mission/purpose is to assist in the facilitation of a new world order he continues to probe and prostrate himself before what he trusts as Truth and the parts of himself that begin surfacing to engage the non-linear environments. At times he is just an observer and at others he is a dynamic contributor, but he still grapples with the sanity of these experiences. How does he do it? You'll love how the subtle details evolve. This is true story, an evolving truth of humanity's evolution and

rightful place among the stars as seen through one who is discovering it on the fly. You might find some correlation or corroboration with your own experience.
